FEMS Microbiology Reviews

AUTHOR INDEX VOL. 12

Alföldi, L. and Bachrati, C.
Genetic experiments with model populations: Fallacies in genetic analysis performed from samples of recombinants selected for two markers (12) 315

Bachrati, C., see Alföldi, L. (12) 315
Buckenhüskes, H.J.
Selection criteria for lactic acid bacteria to be used as starter cultures for various food commodities (12) 253

Chopin, A.
Organization and regulation of genes for amino acid biosynthesis in lactic acid bacteria (12) 21
Christiansen, I., see Hengstenberg, W. (12) 149
Coolbear, T., see Pritchard, G.G. (12) 179

Driessen, A.J.M., see In 't Veld, G. (12) 293

El Soda, M.A.
The role of lactic acid bacteria in accelerated cheese ripening (12) 239

Gasson, M.J.
Progress and potential in the biotechnology of lactic acid bacteria (12) 3

Harder, J.
Ribonucleotide reductases and their occurrence in microorganisms: A link to the RNA/DNA transition (12) 273
Hengstenberg, W., Kohlbrecher, D., Witt, E., Kruse, R., Christiansen, I., Peters, D., Pogge von Strandmann, R., Städler, P., Koch, B. and Kalbitzer, H.-R.
Structure and function of proteins of the phosphotransferase system and of 6-phospho-β-glycosidases in Gram-positive bacteria (12) 149
Hill, C.
Bacteriophage and bacteriophage resistance in lactic acid bacteria (12) 87
Hugenholtz, J.
Citrate metabolism in lactic acid bacteria (12) 165

In 't Veld, G., Driessen, A.J.M. and Konings, W.N.
Bacterial solute transport proteins in their lipid environment (12) 293

Kalbitzer, H.-R., see Hengstenberg, W. (12) 149
Klaenhammer, T.R.
Genetics of bacteriocins produced by lactic acid bacteria (12) 39
Koch, B., see Hengstenberg, W. (12) 149
Kohlbrecher, D., see Hengstenberg, W. (12) 149
Konings, W.N., see In 't Veld, G. (12) 293
Kruse, R., see Hengstenberg, W. (12) 149

Lautier, M., see Le Bourgeois, P. (12) 109
Le Bourgeois, P., Lautier, M. and Ritzenthaler, P.
Chromosome mapping in lactic acid bacteria (12) 109

Marteau, P. and Rambaud, J.-C.
Potential of using lactic acid bacteria for therapy and immunomodulation in man (12) 207

Peters, D., see Hengstenberg, W. (12) 149
Pogge von Strandmann, R., see Hengstenberg, W. (12) 149
Poolman, B.
Energy transduction in lactic acid bacteria (12) 125
Pritchard, G.G. and Coolbear, T.
The physiology and biochemistry of the proteolytic system in lactic acid bacteria (12) 179

Rambaud, J.-C., see Marteau, P. (12) 207
Ritzenthaler, P., see Le Bourgeois, P. (12) 109

Städler, P., see Hengstenberg, W. (12) 149
Stupperich, E.
Recent advances in elucidation of biological corrinoid functions (12) 349

Vandenbergh, P.A.
Lactic acid bacteria, their metabolic products and interference with microbial growth (12) 221

Williams, P.H., see Wooldridge, K.G. (12) 325
Witt, E., see Hengstenberg, W. (12) 149
Wooldridge, K.G. and Williams, P.H.
Iron uptake mechanisms of pathogenic bacteria (12) 325

FEMS Microbiology Reviews

SUBJECT INDEX VOL. 12

Abortive infection
Adsorption inhibition; Restriction and modification; Antisense RNA (Hill, C. (12) 87)

Acceleration of cheese ripening
Lactococcus; *Lactobacillus*; Enzymes; Attenuated cells (El Soda, M.A. (12) 239)

Acetogenic bacteria
Methanogenic bacteria; Methanol; Demethylation; Ether cleavage; Dechlorination (Stupperich, E. (12) 349)

α-Acetolactate
Pyruvate metabolism; Citrate permease; Plasmid; Growth on citrate; Diacetyl; Metabolic engineering (Hugenholtz, J. (12) 165)

Adsorption inhibition
Restriction and modification; Abortive infection; Antisense RNA (Hill, C. (12) 87)

Antisense RNA
Adsorption inhibition; Restriction and modification; Abortive infection (Hill, C. (12) 87)

Attenuated cells
Acceleration of cheese ripening; *Lactococcus*; *Lactobacillus*; Enzymes (El Soda, M.A. (12) 239)

Attenuation
Lactococcus lactis; Nutritional requirements; Gene expression; Transcription; Codon usage (Chopin, A. (12) 21)

Bacterial virulence
Ferric iron; Iron uptake; Pathogenicity; Infection; Host defence (Wooldridge, K.G. (12) 325)

Bacteriocin
Lactic acid bacteria (Klaenhammer, T.R. (12) 39)

Cholesterol lowering
Targeting pharmacological agents; Lactose digestion; Intestinal ecology; Immunostimulation; Oral vaccination (Marteau, P. (12) 207)

Chromosome organization
Lactic acid bacteria; Genome fingerprinting; Genome map; Pulsed-field gel electrophoresis; Genomic diversity; Strain typing (Le Bourgeois, P. (12) 109)

Circular genetic map
Genotypes in selected samples; Genetic information equivocal; One-way transfer of genetic information (Alföldi, L. (12) 315)

Citrate permease
Pyruvate metabolism; Plasmid; Growth on citrate; α-Acetolactate; Diacetyl; Metabolic engineering (Hugenholtz, J. (12) 165)

Codon usage
Lactococcus lactis; Nutritional requirements; Gene expression; Transcription; Attenuation (Chopin, A. (12) 21)

Dechlorination
Methanogenic bacteria; Acetogenic bacteria; Methanol; Demethylation; Ether cleavage (Stupperich, E. (12) 349)

Demethylation
Methanogenic bacteria; Acetogenic bacteria; Methanol; Ether cleavage; Dechlorination (Stupperich, E. (12) 349)

Diacetyl
Pyruvate metabolism; Citrate permease; Plasmid; Growth on citrate; α-Acetolactate; Metabolic engineering (Hugenholtz, J. (12) 165)

Enzymes
Acceleration of cheese ripening; *Lactococcus*; *Lactobacillus*; Attenuated cells (El Soda, M.A. (12) 239)

Ether cleavage
Methanogenic bacteria; Acetogenic bacteria; Methanol; Demethylation; Dechlorination (Stupperich, E. (12) 349)

Evolution
Ribonucleotide reductase; Radical enzymology; RNA world (Harder, J. (12) 273)

Fermented sausage
Starter cultures; Selection criteria; Fermented vegetables; Malolactic fermentation (Buckenhüskes, H.J. (12) 253)

Fermented vegetables
Starter cultures; Selection criteria; Fermented sausage; Malolactic fermentation (Buckenhüskes, H.J. (12) 253)

Ferric iron
Iron uptake; Bacterial virulence; Pathogenicity; Infection; Host defence (Wooldridge, K.G. (12) 325)

Food systems
Lactic acid bacteria; Metabolic products (Vandenbergh, P.A. (12) 221)

Gene expression
Lactococcus lactis; Nutritional requirements; Transcription; Attenuation; Codon usage (Chopin, A. (12) 21)

Genetic information equivocal
Genotypes in selected samples; Circular genetic map; One-way transfer of genetic information (Alföldi, L. (12) 315)

Genome fingerprinting
Lactic acid bacteria; Genome map; Pulsed-field gel electrophoresis; Genomic diversity; Chromosome organization; Strain typing (Le Bourgeois, P. (12) 109)

Genome map
Lactic acid bacteria; Genome fingerprinting; Pulsed-field gel electrophoresis; Genomic diversity; Chromosome organization; Strain typing (Le Bourgeois, P. (12) 109)

Genomic diversity
Lactic acid bacteria; Genome fingerprinting; Genome map; Pulsed-field gel electrophoresis; Chromosome organization; Strain typing (Le Bourgeois, P. (12) 109)

Genotypes in selected samples
Genetic information equivocal; Circular genetic map; One-way transfer of genetic information (Alföldi, L. (12) 315)

Growth on citrate
Pyruvate metabolism; Citrate permease; Plasmid; α-Acetolactate; Diacetyl; Metabolic engineering (Hugenholtz, J. (12) 165)

Host defence
Ferric iron; Iron uptake; Bacterial virulence; Pathogenicity; Infection (Wooldridge, K.G. (12) 325)

Immunostimulation
Targeting pharmacological agents; Lactose digestion; Cholesterol lowering; Intestinal ecology; Oral vaccination (Marteau, P. (12) 207)

Infection
Ferric iron; Iron uptake; Bacterial virulence; Pathogenicity; Host defence (Wooldridge, K.G. (12) 325)

Intestinal ecology
Targeting pharmacological agents; Lactose digestion; Cholesterol lowering; Immunostimulation; Oral vaccination (Marteau, P. (12) 207)

Iron uptake
Ferric iron; Bacterial virulence; Pathogenicity; Infection; Host defence (Wooldridge, K.G. (12) 325)

Lactic acid bacteria
Bacteriocin (Klaenhammer, T.R. (12) 39)

Genome fingerprinting; Genome map; Pulsed-field gel electrophoresis; Genomic diversity; Chromosome organization; Strain typing (Le Bourgeois, P. (12) 109)

Proteolysis; Proteinase; Peptidase; Lactococci (Pritchard, G.G. (12) 179)

Metabolic products; Food systems (Vandenbergh, P.A. (12) 221)

Lactobacillus
Acceleration of cheese ripening; *Lactococcus*; Enzymes; Attenuated cells (El Soda, M.A. (12) 239)

Lactococci
Proteolysis; Proteinase; Peptidase; Lactic acid bacteria (Pritchard, G.G. (12) 179)

Lactococcus
Acceleration of cheese ripening; *Lactobacillus*; Enzymes; Attenuated cells (El Soda, M.A. (12) 239)

Lactococcus lactis
Nutritional requirements; Gene expression; Transcription; Attenuation; Codon usage (Chopin, A. (12) 21)

Lactose digestion
Targeting pharmacological agents; Cholesterol lowering; Intestinal ecology; Immunostimulation; Oral vaccination (Marteau, P. (12) 207)

Malolactic fermentation
Starter cultures; Selection criteria; Fermented sausage; Fermented vegetables (Buckenhüskes, H.J. (12) 253)

Membrane
Transport; Protein-lipid interactions (In 't Veld, G. (12) 293)

Metabolic engineering
Pyruvate metabolism; Citrate permease; Plasmid; Growth on citrate; α-Acetolactate; Diacetyl (Hugenholtz, J. (12) 165)

Metabolic products
Lactic acid bacteria; Food systems (Vandenbergh, P.A. (12) 221)

Methanogenic bacteria
Acetogenic bacteria; Methanol; Demethylation; Ether cleavage; Dechlorination (Stupperich, E. (12) 349)

Methanol
Methanogenic bacteria; Acetogenic bacteria; Demethylation; Ether cleavage; Dechlorination (Stupperich, E. (12) 349)

Nutritional requirements
Lactococcus lactis; Gene expression; Transcription; Attenuation; Codon usage (Chopin, A. (12) 21)

One-way transfer of genetic information
Genotypes in selected samples; Genetic information equivocal; Circular genetic map (Alföldi, L. (12) 315)

Oral vaccination
Targeting pharmacological agents; Lactose digestion; Cholesterol lowering; Intestinal ecology; Immunostimulation (Marteau, P. (12) 207)

Pathogenicity
Ferric iron; Iron uptake; Bacterial virulence; Infection; Host defence (Wooldridge, K.G. (12) 325)

Peptidase
Proteolysis; Proteinase; Lactic acid bacteria; Lactococci (Pritchard, G.G. (12) 179)

Phospho-β-galactosidases
Sugar transport; Phosphotransferase system; Phospho-β-glycosidases (Hengstenberg, W. (12) 149)

Phospho-β-glycosidases
Sugar transport; Phosphotransferase system; Phospho-β-galactosidases (Hengstenberg, W. (12) 149)

Phosphotransferase system
Sugar transport; Phospho-β-glycosidases; Phospho-β-galactosidases (Hengstenberg, W. (12) 149)

Plasmid
Pyruvate metabolism; Citrate permease; Growth on citrate; α-Acetolactate; Diacetyl; Metabolic engineering (Hugenholtz, J. (12) 165)

Proteinase
Proteolysis; Peptidase; Lactic acid bacteria; Lactococci (Pritchard, G.G. (12) 179)

Protein-lipid interactions
Membrane; Transport (In 't Veld, G. (12) 293)

Proteolysis
Proteinase; Peptidase; Lactic acid bacteria; Lactococci (Pritchard, G.G. (12) 179)

Pulsed-field gel electrophoresis
Lactic acid bacteria; Genome fingerprinting; Genome map; Genomic diversity; Chromosome organization; Strain typing (Le Bourgeois, P. (12) 109)

Pyruvate metabolism
Citrate permease; Plasmid; Growth on citrate; α-Acetolactate; Diacetyl; Metabolic engineering (Hugenholtz, J. (12) 165)

Radical enzymology
Ribonucleotide reductase; Evolution; RNA world (Harder, J. (12) 273)

Restriction and modification
Adsorption inhibition; Abortive infection; Antisense RNA (Hill, C. (12) 87)

Ribonucleotide reductase
Radical enzymology; Evolution; RNA world (Harder, J. (12) 273)

RNA world
Ribonucleotide reductase; Radical enzymology; Evolution (Harder, J. (12) 273)

Selection criteria
Starter cultures; Fermented sausage; Fermented vegetables; Malolactic fermentation (Buckenhüskes, H.J. (12) 253)

Starter cultures
Selection criteria; Fermented sausage; Fermented vegetables; Malolactic fermentation (Buckenhüskes, H.J. (12) 253)

Strain typing
Lactic acid bacteria; Genome fingerprinting; Genome map; Pulsed-field gel electrophoresis; Genomic diversity; Chromosome organization (Le Bourgeois, P. (12) 109)

Sugar transport
Phosphotransferase system; Phospho-β-glycosidases; Phospho-β-galactosidases (Hengstenberg, W. (12) 149)

Targeting pharmacological agents
Lactose digestion; Cholesterol lowering; Intestinal ecology; Immunostimulation; Oral vaccination (Marteau, P. (12) 207)

Transcription
Lactococcus lactis; Nutritional requirements; Gene expression; Attenuation; Codon usage (Chopin, A. (12) 21)

Transport
Membrane; Protein-lipid interactions (In 't Veld, G. (12) 293)
